

Expand your nail art horizons with 3D Acrylic Nail Art Molds and create custom nail art designs. 3D Acrylic Nail Art can be easily customized and created with reusable silicone molds brought to you by Sheba Nails - www.shebanails.com

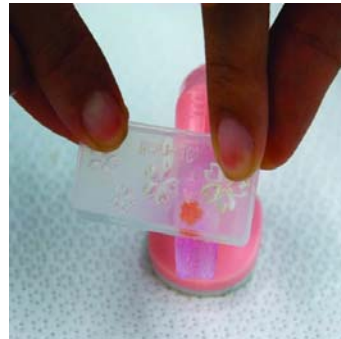

1 - Fill mold with desired acrylic. Experiment with different colors and enhancements such as sparkling acrylic powders. Take advantage of being able to customize and create dimension with gradient color shading.

2 - 3D Acrylic Nail Art piece can be gently removed with tweezers once dry. If you desire, remove while piece is still slightly pliable so you can fit the curve of the nail bed or to create curves in leaves and petals.

3 - Alternatively, the 3D Acrylic Nail Art piece can be applied directly to the nail itself right from the mold.

4 - To apply your creation, place a small ball of acrylic on the nail for placement. Piece may also be applied with nail glue.

5 - Once your design has been achieved, simply seal with clear top coat or UV top coat for long lasting shine.
